Conditions of sale: The seeds, bulbs and plants listed here have been sold and are delivered upon the condition that if they are not true to name and kind or are not as otherwise described on the label or container, the seller's liability is limited to the purchase price thereof. If this condition is not satisfactory, they should be returned at once for proper credit.

Outstanding Ensilage Corns

PAMUNKEY ENSILAGE CORN—Has stood the test of time and still our most popular white ensilage. We recommend it especially for low fertile lands. It produces a tremendous amount of tonnage with unusually large ears of corn, producing mostly 2 ears to the stalk about 12 inches long. Short in supply.

EUREKA ENSILAGE—Tall growing prolific, big eared, heavy tonnage ensilage and we recommend it for upland or lighter land. Also does well on lowland. White. Short in supply.

YELLOW SWEEPSTAKES—A high producing yellow, open pollinated corn, high tonnage and high grain content, semi-prolific big ears. Recommended for uplands or lighter lands, but also does well on lowland.

HYBRID YELLOW SWEEPSTAKES ENSILAGE—Using inbreds out of Yellow Sweepstakes and other high producing lines we have developed a hybrid yellow ensilage that does unusually well on either high or low land. Semi-prolific, with heavy grain and heavy tonnage.

Wood's Feeds
